

Caring for Your Luxe Protection Films

Luxe Protection Films' Paint Protection Film (PPF) is designed to protect your vehicle's paint from scratches, rock chips, and other everyday damage. To ensure maximum longevity and effectiveness, proper care and maintenance are essential.

Wait Before Washing:

Avoid washing your vehicle for at least 10 days after PPF installation.

Gentle Cleaning:

After this period, we recommend hand washing your vehicle. When drying, use a soft microfiber towel and avoid rubbing the film harshly with rough or dry towels.

Important Note for Refinished Surfaces:

If your vehicle's paint has existing issues-such as previous repainting, poor paint quality, or surface damage-paint may peel when the film is removed.

Following these care tips will help keep your Luxe Protection Films looking and performing their best for years to come.
